

I wanted to share my experiences with attorney Matthew Gordon and his firm E3iG. From the initial contact with Matt till the time I filed my I-526 petition, he's been a trustworthy friend who understands every detail of my situation and advised me through the complexities of the EB-5 process. He was always patient and devoted to my case. In August 2021 I had filed an EB-5 green card application based on an investment in an addiction recovery business which was also highly recommended by him and was able to help me with investment due diligence as well. Because of the company's high social value to the US society in treating drug addiction, both Mr. Gordon and the company's immigration counsel believed that the project would qualify for expedited treatment.

To everyone's shock, USCIS rejected my request for expedited treatment. Then what he did for me and my family was truly extraordinary. Mr. Gordon would not accept this outcome. He and the company were able to rally the support of the highest levels of the US Government, including Senator Joseph Manchin, the most powerful member of the US Congress. Faced with all this pressure, USCIS reversed its decision and approved my request to receive expedited status. Mr. Gordon never asked me for any more money, he just kept fighting until we won. He's an excellent attorney when it comes to EB-5 and the depth of his knowledge made me confident at every corner of the process.

If you are interested in EB-5, you will not find a better lawyer to assist you and your family.
